

Steel Fixings

- Trade Name:** MasonMate construction fixings
- Company:** Harrison & Clough Ltd
- Address:** P.O. Box 9, Harclo Road , Off Aireworth Road, Keighley, West Yorks, BD21 4EG
- Tel/Fax:** 0844 571 22 22 / 571 22 23 (8.15am - 6.00pm)
- Material:** MasonMate steel anchors are pre-formed from various types and strengths of steel sheet and rod. In the case of carbon steels, these are zinc plated and chromate passivated for corrosion protection.
- Application:** The steel fixings are positioned into drilled holes in a base material, to provide an attachment point for other articles or equipment.
- See drill manufacturer's instructions before drilling holes and wear goggles to protect eyes from drilling dust.
- Physical Contact:** This presents no problems but normal hygiene precautions should be followed by washing hands before handling and eating food.
- Fume Evolution:** There is no release of any toxic fumes at ambient temperatures.
- Skin Contact:** This presents no problems.
- Ingestion:** Size and shape of the products would generally preclude ingestion but in the event of parts being swallowed, then medical attention should be sought.
- Fire:** Once installed, the fixing is generally protected by the surrounding base material and could continue to function at high temperatures.
- No toxic fumes are emitted.
